

Contributions

Sharath's Contribution (Me):-

1. Was part of mutual collaboration in coming up with the idea for the project
2. Part of mutual collaboration in coming up with the attributes, entity sets and relationship sets
3. Completed the report for Part 1 submission and all part of part 2 report except questions answered by the app.
4. Created the final ER diagram
5. Created the load.sql queries and csv files
6. Created the login and signup functionality and search users by email
7. Created the Tables in PgAdmin using schema and load.sql which were later used for the Streamlit application
8. Made changes to the report and ER diagram as per the feedback given.
9. Added a few of python functionalities and join functions (i.e questions answered by the app) for the streamlit application. For example questions by tags, searching posts by a specific user, etc
10. Populated the CSV and Load.sql files to create tables for the application

Vaibhav's Contribution (Partner) :-

1. Was part of mutual collaboration in coming up with the idea for the project
2. Part of mutual collaboration in coming up with the attributes, entity sets and relationship sets
3. Completed the rest of the python code for the streamlit application
4. Added a few of python functionalities (i.e questions answered by the app) for the streamlit application
5. Created the final schema.sql
6. Created the final video and presentation
7. Completed the part of the report for Part 2 for questions answered by the app
8. Created database.ini
